

DRIP IV

SERVICES AND PRICE LIST

Australia's **First** and **Leading**
IV Vitamin Infusion Company

EXPERIENCE THE BENEFITS OF VITAMIN THERAPY

Drip IV Australia

Drip IV is Australia's first and leading mobile healthcare company specialising in the science of intravenous vitamin therapy (IV). Drip IV offers mobile and in-clinic services across Australia, with 40,000+ vitamin infusions administered nationwide since 2018.

Why IV therapy?

Intravenous vitamin therapy delivers essential vitamins, minerals and amino acids directly into the bloodstream, resulting in close to 100% of nutrients being absorbed.

Drip IV offers a signature menu of vitamin infusions which is customisable to assist with unique wellness and beauty concerns.

How long does an infusion take?

A session takes approximately 30-45 minutes for a standard infusion, depending on the individual.

How can I get an infusion?

Drip IV vitamin infusions can be booked online or by calling 1300 374 748. We offer a mobile service to your home, hotel or office or in-clinic. Single and group sessions are welcome, and "package and save" options are available.

Are vitamin infusions safe?

All Drip IV infusions are administered by skilled Registered Nurses who work alongside Drip IV scripting doctors. Drip IV uses TGA approved vitamins. We have strict screening, safety and hygiene protocols to mitigate any safety risks.

Do you have special offers?

Yes! See our 'Package & Save' options in this brochure. Get exclusive offers delivered to your inbox by subscribing to our e-newsletter.

How do I know what I need?

Drip IV offers free in-depth nurse consultations over the phone to establish your wellness needs. We also have a thorough screening process to understand your health status. Your nurse will also go over your treatment plan in-person on the day of your treatment.

DRIP IV AUSTRALIA

IV VITAMIN INFUSION MENU

\$179

HYDROBOOST

Instantly hydrate and revitalise your body with essential minerals and nutrients. Hydration improves mental clarity, restores electrolytes and keeps muscles hydrated.

Contains Hartmann's or Saline.

\$249

RECOVER

Replenish your body pre or post-event in under 60 minutes. Rehydrate, flush out toxins, restore lost nutrients and detox your system at the cellular level with the Recover drip.

Contains Hartmann's, Glutathione and B Complex.

\$249

SLIM BOOST

Regulate your metabolism, recover faster from exercise and support your weight loss goals with a highly concentrated dose of lipid metabolisers, electrolytes and multi-vitamins.

Contains Hartmann's, B Complex, Methionine Inositol and Choline (MIC).

\$249

B COMPLEX

Fundamental for many cellular functions, the B Complex infusion supports physiological and neurological functioning. It may reduce fatigue, increase energy levels and improve mental acuity.

Contains Hartmann's and B Complex (B1, B2, B3, B5, B6 and B12).

\$249

GLUTATHIONE

Glutathione is a super antioxidant made in the body's cells. Replenishing depleted glutathione levels aims to reduce oxidative stress, improve skin health, detox at the cellular level, fight against autoimmune diseases, improve sleep and support healthy gut function.

Contains Hartmann's and Glutathione.

\$249

VITAMIN C

Vitamin C aids the absorption of other essential nutrients and assists many biological functions, including the growth and repair of all body tissues. Support protective cellular defences, aid collagen and elastin formation and more.

Hydration Fluids and Vitamin C.

GLOW

An antioxidant-packed infusion that elevates your outer glow from within while fighting the signs of ageing. Boost collagen and elastin formation, hydrate and detox skin cells and promote strong and healthy hair and nail growth.

Contains Hartmann's, Vitamin C and Glutathione.

IMMUNE BOOSTER

This infusion is formulated to help fight off illness by strengthening the immune and nervous systems. By supporting red blood cells and cognitive function, you may experience an improvement in mood, energy and concentration.

Contains Hartmann's, Vitamin C and B Complex.

PERFORMANCE ENERGY

Improve your athletic performance and speed up recovery by hydrating and replenishing lost nutrients. This infusion aims to improve energy, stamina and muscle recovery while easing cellular and metabolic stress.

Contains Hartmann's, B Complex, Vitamin C and Taurine.

* Hartmann's solution contains electrolytes (sodium, potassium and calcium).

THE ULTIMATE

With high levels of antioxidants, amino acids and nutrients, The Ultimate is formulated to support the immune and cognitive processes, improve energy and mood, boost metabolism, assist fertility levels, detox cells and promote healthy skin, hair and nails.

Contains Hartmann's, B Complex, Glutathione and Vitamin C.

NAD+ INFUSION

NAD+ is an essential coenzyme found in every cell of the body. Replenishing NAD+ promotes cellular regeneration, repairs DNA, protects brain cells, reduces inflammation and stimulates enzymes to perform important biological processes to support healthy ageing.

Post-infusion, patients may experience an improvement in energy levels and mental acuity and a decrease in symptoms associated with disease and substance addiction.

Recommendation: weekly sessions for three weeks or customised depending on your health status and concerns. The \$500 per infusion discounted rate is only available when pre-purchasing three NAD+ infusions.

MYERS' COCKTAIL

The Drip IV Myers' Cocktail infusion is full of essential vitamin and minerals which play important roles in several biological processes. Refresh, energise and recover physically and mentally while boosting the immune system.

Contains Hartmann's, B Complex, Vitamin C, Magnesium and Zinc.

IV INFUSION ADD-ONS

Customise your infusion with additional vitamins, minerals and amino acids to achieve your unique goals. If required, our registered nurses will recommend customising your IV vitamin drip based on your wellness concerns.

FOLLOW DRIP IV:

IM BOOSTER SHOTS

Intramuscular injections (IM) deliver vitamins, minerals and amino acids deep into the muscles, allowing the nutrients to be absorbed into the bloodstream quickly. IM booster shots are available in conjunction with IV vitamin infusions.

Vitamin D Mega Shot

The Vitamin D Mega Shot can only be administered once a year. You must organise a blood test to check your Vitamin D levels before proceeding with an appointment. Contact Drip IV for further information regarding our protocol on Vitamin D.

Contains Vitamin D.

NAD+ Booster Shot

The NAD+ booster shot is formulated with the super molecule NAD+, B Vitamins and Amino Acids. This booster may support physiological functions including gut, heart, brain and eye health.

Contains 100mg NAD+, Thiamine (B1), Riboflavin-5-phosphate (B2), Niacinamide, Dexpanthenol (B5) and Taurine.

Post-Virus Recovery Shot

This booster contains a blend of non-essential amino acids which cannot be made by the body if ill or the immune system is under stress. Support cardiovascular health, urea cycle processes, immune and digestive function and more.

Contains Arginine, Ornithine and Citrulline.

Tranquility Shot

The Tranquility shot is formulated to calm nerves, reduce stress and relax muscles.

Contains Magnesium Sulphate, Gamma Aminobutyric Acid (GABA), Serine and Taurine.

Biotin Shot

Biotin promotes skin, hair and nail health, improving the condition and strength.

Contains Biotin.

ALA Shot

The ALA shot supports cellular energy production, aids neurological health and replenishes nutrients depleted due to illness or injury. It may also have an anti-inflammatory effect.

Contains Alpha Lipoic Acid, Palladium and other trace minerals.

B12 Shot

Boost energy and mood and improve sleep quality with the B12 shot. B12 supports cognitive function and overall brain health.

Contains Methylcobalamin (B12).
